**Orchidology
Cymbidium Seedling**
6-24 month out of flask

We have the following cymbidium seedlings available, our seedlings have been hardened off for a period of 6-24 months and are a cost effective way to build an Orchid collection . Available in 7.5/9cm/12cm pots. Cymbidiums should Flower in 1-3 years . Where we can we have provided potential progeny descriptions as well as a picture of the expected outcome, progeny could vary from what we describe depending on genes and variance somewhere in the parents ancestry . Many of the cymbidiums are first of their types and won't be found elsewhere . New seedlings will be added from time to time , please enquire at paul@orchidology.co.za / www.orchidology.co.za

Cymbidium Repotting Info

Repotting your cymbidium

- **When**

- Potting medium has broken down
- Plant over grown in pot
- Poor flowering
- 4-5 years in the same medium
- Disease
- Best time to repot is Spring

- **How**

- Remove all old medium
- Remove old bracts, leaves and brown roots
- Divide into sections of 3-4 leafed bulbs
- Treat any disease
- Plant old pseudo bulbs in river sand
- Pack plant firmly in medium
- Dress wounds with flowers of sulphur or rose seal
- Water the following day
- Keep in cool shaded area

- **Learn more**

- Visit Orchidology shop on 28 May 11:00 for a repotting demo
- Visit www.aos.org, orchid care

Cymbidium Repotting Medium

What potting medium to use

- 70% Bark chips 1-2cm
- 30 % Coco Husk Chips

Optional

- Perlite
- Charcoal
- Gravel/Stones
- Polystyrene
- Peat

Tips

Wash and rinse bark well
Allow Bark to soak 1-7 days
before use, the longer the better.
Add 1tbs superphosphate, 1 tbs
agricultural lime &
1 tbsp. bone meal to each 20cm
pot

Orchidology's Flowering Plants

First flowering of Cymbidium Neutron Star for the season.

Cymbidium Neutron Star is a hybrid we made in 2018, the seed was germinated at King plants and deflasked at Orchidology 2019 and 4 years later we have some flowers.

Cym. Neutron Star 'Mothers Day'

Cym. Neutron Star 'Peppermint Cream'
