# Cattleya

OS1862 Btc. Little Mermaid 'Janet' x C. Final Touch  
'Hatford'  
NFS R140

# New Flasks

We have the following flasks available, each flask comes with 30 seedlings in a 1 litre container. All our flasks are done by King plants so are of the highest quality and ready to be deflasked.

Where we can we have provided potential progeny descriptions as well as the pics and names of the parents and hybridizer, although progeny could vary from what we describe depending on genes and variance somewhere in the parents ancestry. New flask additions are added from time to time, please enquire

# New Hybrids

## Onc. Guann Shinn Rouge x sotoanum

Hybrid made by Orchidology , Medium size oncidium crossed with miniature specie sotoanum , has resulted in small to medium sized oncidium with red to orange blooms , easy growing tolerant plant. Only 30% are fragrant which comes from the sotoanum parent

## Cym. aloifolium x madidum 4n

A cymbidium hybrid made by Richard King and treated at King plants to increase ploidy has resulted in this interesting hybrid. The large growth habit from the madidum parent is clearly evident, the result is a large cymbidium with 1 m long, wide and thick leathery leaves. The flowers are noted for fantastic texture, substance and shape, a result of the ploidy treatment. The flowers are supported on a long pendule of 30-40 blooms. Bloom size is similar to that of aloifolium. The longevity of the blooms in hot summer conditions of 30 Degrees plus, inherited from madidum. . A strong sweet fragrance with hints of coconut is emitted during the day.
