

Orchid Flasks

We have the following flasks available, each flask comes with 30 seedlings in a 1 litre container. All our flasks are done by King plants so are of the highest quality and ready to be deflasked.

Where we can we have provided potential progeny descriptions as well as the pics and names of the parents, although progeny could vary from what we describe depending on genes and variance somewhere in the parents ancestry.

New flask additions are added from time to time , please enquire
