

HOW TO MOUNT YOUR MINIATURE ORCHIDS

MOUNTING AND ORCHID GROWING GUIDE

1° STEP

Wet the sphagnum moss
Remove the orchid from pot and
shake off potting medium.

2° STEP

Place orchid on the rock in
desired position. Orchids such as
Vanda's , dendrobiums , tolmumnias
and sarochochilus love to be grown
on rocks , wood and twigs.

3° STEP

Place sphagnum moss over roots ,
gently wrap wire over moss and
secure. Use just enough moss to
cover the roots, not to much.

4° STEP

Mist your plantscape every 2-3
days , less in cold weather and
more in warm weather. Your
orchids will enjoy morning sun
(3 hours) then afternoon shade
OR grow them under artificial
lights

5° STEP

Grow your plantscape at 8-26
Deg C , they will enjoy a
difference in day and night
temperatures of at least 7 Deg
C, this helps initiate flowers

6° STEP

Your plantscape can be grow in a
terrarium or paludarium, remember to
keep your terrarium out of direct
sunlight. We recommend regular
venting your terrarium or using a
terrarium with a small fan or an open
terrarium and paludarium to ensure
good ventilation.
